## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6, 9, 11, 13-23 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Stapleton 5,016,799.

Stapleton teaches a support stanchion comprising a support 26, a cover 30, a pair of side walls 34, 36, a web/pedestal 52, an aperture 54, ears 32, an adapter 22, spaced openings 42 and protrusions 66.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 4, 12, 14, 24 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stapleton 5,016,799.

The use of stamped sheet metal, molded plastic and die-cast metal to form stanchions for luggage carrier is old and well known in the art. To form the stanchion of Stapleton from any of these materials would have been obvious.

5. Claims 10, 27, 28, 30, 31 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stapleton 5,016,799 in view of Lumpe et al. 5,497,925.

The use of a gasket on the bottom of a stanchion to prevent the surface of a vehicle from being scarred is old and well known in the art as taught by Lumpe. To provide Stapleton with a gasket would therefore have been obvious for this reason.

***Allowable Subject Matter***

6. Claims 5, 7, 8, 29 and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

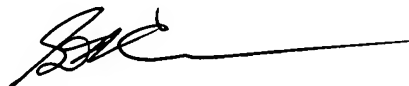

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
